Attached is a report for Region 2, "*Leaching Behavior of AGREMAXTM Manufactured Aggregate Collected from a Structural Fill Application in Puerto Rico*".

There are two files - the Word document is the main report plus Appendix A (Results) and half of Appendix B (QA/QC). The PDF is the detailed QA/QC reports which cannot be easily incorporated into the MS Word document.

Region 2 is anxious to get this report so we are requesting comments within 2 weeks, by Oct 19th. Region 2 collected the samples and the report includes the chain of custody forms.

Please let me know if you are unable to meet that deadline. We are hoping that out of 5 reviewers, we will be able to meet Region 2's deadline. Please return the signed form along with any comments on the report.

It is a short report and mostly figures.

Kind regards-

Susan T.
